ALEPH OBSERVER™

Daily Monitoring over Hundreds of Sites

Persistent Earth Observation for Defense and Intelligence

Aleph Observer monitors hundreds of sites across customer-designated areas of interest with assured capacity. High-resolution imagery and embedded analytics are delivered as a continuous intelligence stream for faster, more confident action.

Aleph Observer **Quality at Scale:**

▶ **Hundreds of Sites, Everyday**

Simultaneous monitoring across customer-designated locations

▶ **Capacity Secured in Advance**

Coverage maintained in high-demand regions

▶ **Theater-Level Coverage**

Monitoring structured across full areas of interest

What Changes **Operationally**

- ✓ Programmatic coverage, not constant retasking
- ✓ Reduced reliance on daily availability requests
- ✓ Monitoring secured across full areas of interest
- ✓ Capacity reserved in advance, even during surge demand

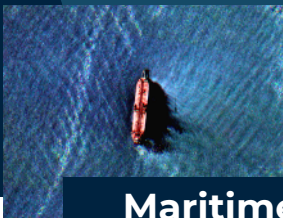

SATELLOGIC

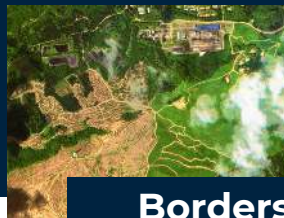

Total Visibility Across Your AOI

Tasking requires knowing where to look before requesting. Persistent, globe-scale capacity brings priority sites across entire regions in focus, making it possible to separate signals from baseline activity as they emerge.

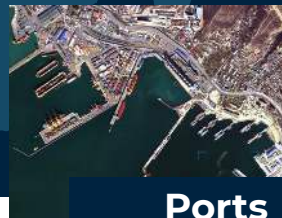

Maritime

Fleet patterns are watched across international waters, revealing maritime threats and operational posture changes.

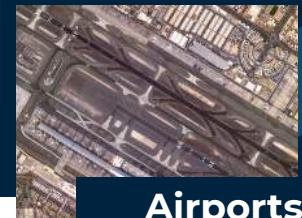

Borders

Cross-border activity remains in clear focus, exposing unusual traffic and potential security risks in advance.

Ports

Port and logistics centers are closely monitored, so trade lines and supply chains remain secure.

Airports

Aircraft and terminal activity is tracked across civil and military airspace to spot unusual patterns and threat signals.
